PCM Climate ceiling

PCM Climate ceiling

The Orange Climate sales office has been fitted with an unique PCM Climate ceiling.

Sales office

OC WATERLOO

WE ARE CONSTANTLY DEVELOPING NEW PANELS FOR OUR PCM CLIMATE CEILING. AT OUR SALES OFFICE, WE HAVE USED AN UNIQUE STEEL PANEL OF OUR OWN DESIGN FOR THE FIRST TIME. IT SEEMED THE IDEAL OPPORTUNITY TO TRY IT FIRST IN OUR OWN OFFICE AND, IF SUCCESSFUL, ROLL IT OUT ONTO THE MARKET.

Steel panel with perfect perforation

To guarantee the quality and degree of perforation, we have teamed up with Hunter Douglas to develop a unique steel panel. After a special production process, the panels are delivered coated with a perfect degree of perforation. The panels are extremely strong, do not bend and are mounted flush with the ventilation grilles, creating a flush-in effect. This produces a stylish and quiet design. The panels are 600 x 600 mm and can be supplied in any colour. The combination of steel panels and PCM can justifiably be called a sustainable high-end solution with a good price/quality ratio.
